

Environmental, Health and Safety Statement

Global Partners LP is committed to the well-being of our employees, contractors, customers and the communities in which we live and operate. We adopt environmental, health and safety protections as a core principle in all of our activities and believe that commitment is critical to our organization. We endeavor to identify and appropriately address the risks of our operations to predict and prevent incidents.

Global is an integral part of the energy infrastructure in the areas where we live and conduct our business, and Global is dedicated to fulfilling this role in a responsible manner. We conduct our operations with integrity, and incorporate our Environmental, Health and Safety (EHS) strategy into our business operations to manage and reduce overall environmental impact and promote a culture of prevention that identifies and prevents circumstances that could lead to injury or harm to the environment.

Everyone, at all levels of our company, is accountable for compliance with applicable regulatory and Global EHS requirements, and we design and implement controls to identify, communicate and comply with these requirements. We are responsible for our personal safety and the safety of those around us, understanding our EHS requirements, and incorporating these elements into our daily work.

Global will engage employees to maintain effective EHS programs. We encourage constructive relationships with our neighbors, collaboration with parties on items of mutual interest, and active participation in the development of and compliance with EHS laws, regulations and standards.

We are committed to continuously improving our EHS strategy and culture. In this regard, we leverage and advance our knowledge and experience to sustain this principle. Lastly, we periodically measure our performance using results-oriented data-driven systems to evaluate and improve our performance and assess our standards.

A handwritten signature in blue ink, appearing to read "Eric Slifka". The signature is fluid and cursive, with a long horizontal stroke extending to the left.

Eric Slifka
President and Chief Executive Officer
